

## Replacement Parts Schedule

Part	Replacement Recommendation	Reason
Full Face Cushions 	1 per month	Cushions breakdown and lose seal over time.
Nasal Cushions & Pillows 	2 per month	Cushions breakdown and lose seal over time.
Headgear 	6 to 9 months	Headgear stretches out and over time they require more and more tightening. This can affect how the mask fits.
Humidity Chamber 	6 to 12 months	Mineral deposits can build up in your humidifier and be unsanitary and irritating to your sinus. Using distilled water and emptying your water chamber every morning may increase the life of your chamber.
Tubing 	3 months	Mineral deposits can build up over time and compromise air quality and delivery.
Filters 	6 months	Reusable filters are meant to be rinsed and reused, but no longer than 6 months. Replacing the filters means cleaner higher quality air intake.
Fine Filters 	2 per month	Fine filters do exactly that, filter very fine particles so they cannot be washed, only replaced. It's recommended they are changed every month.
